

David J. Anderson, OSCP

**Principal
CLA**

Minneapolis, Minnesota

David is a principal and cybersecurity consultant in the CLA National Digital group, with a strong focus on offensive cybersecurity. He has over 13 years of experience in the field, performing penetration testing, vulnerability assessments, and social engineering engagements. David's expertise also includes project management for cybersecurity engagements across a diverse range of industries. He speaks frequently to national conferences and training events on cybersecurity topics, such as penetration testing and vulnerability assessments, corporate account takeovers, email phishing, social engineering and network security. He earned a B.A. degree in information technology networking and security from Minnesota State University-Mankato and holds the Offensive Security Certified Professional (OSCP) professional designation.
