

Tracy Gromniski

**Senior Vice President of Business Solutions and Technology
Ellement Consulting Group
Winnipeg, Manitoba**

Tracy Gromniski is the senior vice president of business solutions and technology, overseeing custom and commercial software development, infrastructure, security and data management. Gromniski has more than 20 years of experience in technology and provides innovative solutions to complex business challenges. She has certifications in project management and business analysis and is double certified in change management. With a diverse background in agriculture, food manufacturing, logistics and transportation, health and finance, she offers unique insights and support to businesses in optimizing workflow processes and implementing software solutions. Gromniski has delivered over 60 successful projects, some exceeding budgets of \$25 million, including system implementations, digital transformations and custom software development. She is recognized for her exceptional problem-solving skills and leadership in leading cross-functional teams.
